漢字的奧秘

巡迴展覽

Mystery of Chinese Writing Roving Exhibition

漢字是中華文化的根脈，是記載、保存和傳承中華文明的重要載體，是鑄牢中華民族共同體意識的文化紐帶。漢字作為最古老的文字之一，自產生以來始終綿延不斷，沿用至今。

歷經幾千年的風霜，漢字不斷，中華文明才能綿延不絕。今天，漢字作為聯合國六種正式工作文字之一，是世界上最多人使用的文字。

《漢字的奧秘》巡迴展覽由康樂及文化事務署轄下的弘揚中華文化辦公室及中國文字博物館聯合籌劃，講述漢字的起源、發展和傳播的歷史進程，展示漢字書寫藝術的神奇魅力。

Chinese characters are an important root of Chinese culture and an embodiment of Chinese civilisation. They serve as a cultural link for building the sense of community for the Chinese nation. Being one of the oldest written languages, Chinese characters have been in use to this day.

Throughout thousands of years of development, the use of Chinese characters has never been ceased, so that Chinese civilisation continue to flourish. Today, as one of the six official working languages of the United Nations, Chinese character as a written language is the most widely used in the world.

Jointly organised by the Chinese Culture Promotion Office of the Leisure and Cultural Services Department and the National Museum of Chinese Writing, the 'Mystery of Chinese Writing' roving exhibition introduces the origins, development and dissemination of Chinese characters, and showcases the charm of Chinese writing.

CHINESE CULTURE PROMOTION OFFICE

源遠流長的中華文化博大精深，蘊含多元融和的特質，賦予我們共同的價值觀和生活模式。我們將透過展覽、活動、交流、合作和推廣，讓社會大眾體會中華文化的精髓，增強對國家認同和文化自信。

Chinese culture, with its long history, vast scope and profound depth, is characterised by its perpetuity, diversity and inclusiveness. It has shaped the values and way of life we all share. We aspire to make use of exhibitions, activities, exchanges, collaborations and promotions to enable young people and the public at large to appreciate the essence of Chinese culture and enhance their sense of national identity and cultural confidence.

中國文字博物館
National Museum of Chinese Writing

中國文字博物館是我國唯一一座以文字為主題，並集文物保護、陳列展示、學術研究、社會教育和文化交流為一體的國家一級博物館，是中華漢字文化的科普中心。

The National Museum of Chinese Writing is the only national first-grade museum in China that integrates heritage conservation, exhibition display, academic research, social education and cultural exchanges on the theme of characters, and it is the scientific centre of Chinese character culture.

漢字的演變

The Evolution of Chinese Characters

漢字起源於遠古刻畫符號，最晚成熟於商代（公元前1600年—前1100年），歷經甲骨文、金文、小篆、隸書、楷書等不同發展階段。

Originating from ancient inscribed symbols, Chinese characters matured in the Shang Dynasty (1600 BC - 1100 BC) and went through developmental stages of oracle bone script, bronze inscription, small seal script, clerical script and regular script.

遠古符號

• • • • Ancient Symbols

漢字發明以前，中國遠古先民曾經以結繩、圖畫、符號記事。從倉頡造字的古老傳說到一百多年前甲骨文發現，歷代學者一直致力於揭開漢字起源之謎。

Before Chinese characters were invented, ancient Chinese ancestors used tied knots, drawings and symbols to record. From the ancient legend of Cang Jie's creation of Chinese characters to the discovery of oracle bone scripts more than a century ago, scholars throughout the years have endeavoured to unravel the mystery of the origin of Chinese characters.

倉頡

Cang Jie

傳說黃帝的史官倉頡創造了漢字，他「四目雙瞳」，在中國被尊稱為「字祖」。今天我們其中一個常用的中文輸入法，也以「倉頡」命名。

Legend has it that Cang Jie, who was a historian of Yellow Emperor (a legendary ruler of prehistoric China), had 'four eyes and two pupils'. He created Chinese characters and is therefore honoured as 'the Father of Characters' in China. Today, one of the commonly used Chinese input methods is also named 'Cang Jie'.

甲骨文

Oracle Bone Script

甲骨文是中國現存最早、體系較為完整的文字，刻寫在龜甲和獸骨上，用於記錄占卜的內容和結果。其時代大致在公元前14世紀至11世紀的殷商時期，主要發現於河南安陽殷墟，距今已有3000多年。迄今出土甲骨共約16萬片，總計單字數約5000個，可釋字約1500個。甲骨文把中國的信史向前推進了約1000年。

殷商時期的甲骨占卜，內容十分豐富，如：祭祀、戰爭、田獵、氣象、生育、車禍等。殷人無論大小事都要進行占卜，以求得祖先和神靈的保佑。

Oracle bone script is the earliest surviving and relatively complete system of writing in China. It was inscribed on turtle shells and animal bones, and was used to record the contents and results of divination. It dates from the Shang Dynasty (14th century BC – 11th century BC), more than 3,000 years ago. About 160,000 pieces of oracle bones have already been unearthed mainly at Yinxu in Anyang, Henan Province. There are about 5,000 single characters identified on the oracle bones, and nearly 1,500 characters could be interpreted. The oracle bone scripts have pushed the recorded history of China forward by about 1,000 years.

Divinations through oracle bones in the Shang Dynasty cover almost every aspect of daily life, such as rituals, wars, hunting, weather, reproduction and accidents, etc. The people in the Shang Dynasty would perform divination for everything to seek blessings and protection from their ancestors and deities.

(一) 庚戌卜，貞貞：
王立季，受年？

Divination performed at geng-xu. Ke of the Shang Dynasty asked whether there would be a harvest if millet was grown.

(二) 貞：畫來牛？

Should Hua send an ox to the Shang king as a tribute?

「庚戌」是占卜的日期，「貞」是貞人（商代進行占卜的神官）的名字。這版刻辭一是問商王種植麥是否有好年成；二是問「畫」這個人應否向商王進貢牛。

'Geng-xu' refers to the date of divination while 'Ke' (殼) is the name of the zhen ren (a spiritual officer who performed divination in the Shang Dynasty). The inscription aimed to divine whether there would be a harvest if millet was grown and whether Hua should send an ox as a tribute to the Shang king.

金文

Bronze Inscription

金文是商周時期（公元前17世紀—前221年）鑄或刻在青銅器上的文字，用於記錄祀典、賜命、徵戰、盟約等事件，以及對祖先及王侯們功績的頌揚。商周時期的青銅器大多是祭祀用的禮器，由於古人把銅稱作金，這些文字被稱為「金文」。

Bronze inscription is the writing cast or carved on bronze vessels in the Shang and Zhou Dynasties (17th century BC – 221 BC) to record ceremonies, decrees, battles, treaties and the eulogies to imperial ancestors and nobility. Most of the bronze vessels in the Shang and Zhou Dynasties were ceremonial vessels. Since the ancients called copper and bronze gold, the bronze inscriptions are therefore literally known as 'gold writings' in Chinese.

司母戊鼎

（又稱后母戊鼎）

Simuwu Square Cauldron (*Ding*)
(or Houmuwu Square Cauldron)

該鼎是目前已知中國古代最重的青銅鼎。鼎腹內壁鑄有「司母戊」三個字，「戊」是器物主人的廟號（中國君王死後在廟中被供奉時的名號），此鼎可能是商王祖庚祭祀母親戊而鑄造。由於甲骨文及全文中有不少反寫的例子，有學者認為「司」應為「后」，代表器物主人生的地位。

This cauldron is the heaviest bronze cauldron from ancient China ever discovered. There are three characters '司母戊' (*Si Mu Wu*) engraved inside the vessel of which '戊' (*Wu*) refers to the temple name (a name given to a deceased Chinese emperor for ancestral worship in temple) of the owner, suggesting that it was probably made by King Zugeng of the Shang Dynasty in honour of his mother. Since there are many examples of reverse writing on oracle bones and in bronze inscriptions, some scholars suggest that the character '司' (*Si*) should be '后' (*Hou*, literally 'empress') instead, representing the status of the owner during her lifetime.

There are 32 words cast inside the vessel. It is the only extant relic recording the significant historical event of King Wu's conquest of the Shang troops. Gui is a food utensil for keeping rice and millet, etc. In Guangdong, a popular term, 'Nine Big Gui', refers to a sumptuous meal.

小篆

Small Seal Script

春秋戰國時期（公元前770年—前221年）諸侯割據，字形、讀音各有差異。秦統一六國（公元前221年）後實行「書同文」的措施，把秦國原來使用的大篆修改成為小篆，統一了全國的文字，推動了社會經濟文化繁榮。

During the Spring and Autumn Period and the Warring States Period (770 BC – 221 BC), feudal lords ruled the country, and the Chinese characters have different forms and pronunciations. After the unification of six states by Qin (221 BC), the measure of writing in the same script was implemented. Small seal script was created as the common writing in the whole country to replace large seal script which was formerly used in the state of Qin, promoting social, economic and cultural prosperity.

嶧山刻石

The Stele of Mount Yishan

秦始皇二十八年（公元前219年）李斯立，是小篆的代表作，內容為頌揚秦始皇功績。

Written by Li Si in the 28th year of Emperor Qin Shihuang (219 BC), this stele is a prominent example of small seal script that extols the achievements of Qin Shihuang.

were called the kings.

隸書

Clerical Script

隸書起源於戰國晚期，到漢代成為主流字體。隸書將小篆圓轉的線條改為方折並簡化，書寫起來更為方便。自此，漢字的象形性消失，筆畫逐漸定型。由小篆發展至隸書的過程稱為「隸變」，是漢字由古文字進入今文字階段的分水嶺。

Clerical script originated in the late Warring States Period and became the mainstream writing in the Han Dynasty. It simplified and transformed the round strokes of small seal script by replacing them with squares and folds, making it easier to write. Since then, the pictographic nature of Chinese characters disappeared and the strokes of characters gradually formed. The development from small seal script to clerical script is the watershed from the ancient to the modern stage of Chinese characters.

正始石經 Zhenzhi Stele

別立於三國魏正始二年（公元241年）。因碑文每字皆用古文、小篆和漢隸三種字體刻寫，也叫三體石經。刊刻石經的主要目的是弘揚儒學，也有校正文獻內容的作用。

Carved in the 2nd year of the Zhengzhi reign of Wei in the Three Kingdoms Period (AD 241), this stele is also known as the three-script stele because each character of the inscription is written in three forms including ancient characters, small seal script and clerical script. The main purpose of the inscription was to promote Confucianism and standardise the contents of literature.

楷書

Regular Script

楷書形體方正，筆畫平直，可作楷模，故名楷書。加上筆畫簡潔，便於印刷，使楷書成為最大眾化的書體，也就是我們今天通用的標準字。楷書始於東漢（公元25年—220年），至隋唐時期（公元581年—907年）趨於成熟。

The regular script is characterised by its square structures and upright strokes, making it a model for writing. Hence, the name of regular script was given. Additionally, its simple and clean strokes are convenient for printing, making regular script the most popular style of writing and the standard characters we commonly use today. Regular script originated in the Eastern Han Dynasty (AD 25–220) and matured during the Sui and Tang Dynasties (AD 581–907).

九成宮醴泉銘

Inscription on the Li Spring at Jucheng Palace

唐貞觀六年（公元632年）刻立。唐代楷書石刻，魏徵撰文，歐陽詢書，記述唐太宗在九成宮避暑時發現醴泉之事。

Erected in the 6th year of Zhenquan of Tang Dynasty (AD 632), this stele of Tang Dynasty bears an inscription in regular script written by Ouyang Sun. The content composed by Wei Zheng records that Emperor Taizong of the Tang Dynasty found the Li Spring when he summered at the Jucheng Palace.

神奇的造字法

The Magical Formation of Chinese Characters

「六書」是古代關於漢字構形分析的理論，包括：象形、指事、會意、形聲、轉注、假借。一般認為前四種是造字方法，後兩種是用字方法。從構字方法上看，早在甲骨文時期就有象形字、指事字、會意字，而且還出現了形聲字。

'Liu Shu' (six principles of Chinese characters composition) is an ancient theory on the structural analysis of Chinese characters' formation. The six approaches are pictographs, indicatives, ideographs, pictophonetic compounds, derivative cognates and phonetic loans. It is generally agreed that the first four are methods of character creation while the remaining two are methods of character usage. In terms of character formation, pictographs, indicatives, ideographs and pictophonetic compounds came into existence during the period of oracle bone script.

造字方法 How Characters Were Formed

象形 Pictographs

用描寫事物形象作為造字方法。
象形字是其他造字法的基础。
Adding picture strokes to reflect the physical attributes of things. Pictographic characters are the basis for other word formation methods.

甲骨文 / 金文 Oracle Bone Script / Bronze Inscription	小篆 Small Seal Script
■ 日：象太陽之形。 Read: The character represents the shape of the sun.	
■ 月：象月亮之形。 Read: The character represents the shape of the moon.	

形聲 Pictophonetic Compounds

以事物的形聲作為形聲。
再以讀音相同或相近的字作為聲旁。
Combining a pictographic component denoting the category of a character and a phonetic component denoting its similar pronunciation.

甲骨文 / 金文 Oracle Bone Script / Bronze Inscription	小篆 Small Seal Script
■ 水：象「水」和「氵」構成。 「水」表示此字的屬性是流體名稱，「氵」表示讀音。 Read: '水' consists of the characters '水' and '氵' with '氵' denoting the attribute of a river and '水' sign indicating the pronunciation.	
■ 河：象「水」和「可」構成。 「水」表示此字的屬性是河流名稱，「可」表示讀音。 Read: '河' consists of the characters '水' and '可' with '水' denoting the attribute of a river and '可' sign indicating the pronunciation.	

轉注 Derivative Cognate

屬於同一部首或同一類型的字。
其字義可以互相解釋。
Characters belonging to the same radical or having the same rhyme or sound in their etymological origin. A reciprocal explanatory relation.

甲骨文 / 金文 Oracle Bone Script / Bronze Inscription	小篆 Small Seal Script
■ 考：「考」和「耂」屬同一部首。 讀音相同，字義互相關聯。 Read: The characters '考' and '耂' belong to the same radical and have the same rhyme scheme, so the meaning of the characters can be interpreted by each other.	

指事 Indicatives

一類是純抽象的記號，另一類是在象形字的基礎上添加象徵性的符號。
One type is purely abstract signs, and the other type is formed on pictographic characters with intuitive symbols added.

甲骨文 / 金文 Oracle Bone Script / Bronze Inscription	小篆 Small Seal Script
■ 上：刻劃在長劃之上者為上。 Up: Above. A short stroke above a long stroke indicates 'up' or 'above'.	
■ 末：樹木上一端無枝，意為樹梢。 Read: A short stroke horizontal line is added to the character '木' (tree), indicating the tree's top.	
■ 日：在「口」中加一橫劃，表示口中所含之物。 Read: A short stroke horizontal line is added to the character '口' (mouth), indicating what is contained in the mouth.	

會意 Ideographs

把兩個或以上的象形字組合在一起，得出新的字義。
Combining two or more pictographic characters to create a new word.

甲骨文 / 金文 Oracle Bone Script / Bronze Inscription	小篆 Small Seal Script
■ 「森」由「木」三筆高堆在「木」上，表示集中之意。 和「林」的區別在於「木」的數量。 Read: The character '森' refers to forest, and its position on a tree '木' signifies the act of assembling.	
■ 明：由「日」和「月」構成，表示光亮之意。 Bright: Consisting of the characters '日' (sun) and '月' (moon), '明' means bright.	
■ 休：由「人」和「木」構成，表示人在樹下休息之意。 Read: Consisting of the characters '人' (man) and '木' (tree), '休' means that someone is resting under the shade of a tree.	

假借 Phonetic Loans

借用已有的音同或音近的字，記錄有音無字的語言。
Borrowing existing words with the same or similar pronunciation to fill new words gaps with phonetic loans.

甲骨文 / 金文 Oracle Bone Script / Bronze Inscription	小篆 Small Seal Script
■ 自：原是鼻之象形，聲借於表示「自己」的「自」。 表示鼻之義者皆失矣。 Read: Originally a pictograph of the nose, it was borrowed to mean 'self' and the original meaning of the new word disappeared.	
■ 自：原是蛇之象形，聲借於表示「自己」。 由這到「自」，字子並非中國土產，聲借於「自」。 古時聲借「自」，「自」之字。 Read: Originally a pictograph of a snake, it was borrowed to refer to a third person '自' in ancient times. There was no distinction between '自' and '自'.	
■ 來：原是隹之象形，聲借於表示「自己」。 由這到「來」，字子並非中國土產，聲借於「自」。 與「天所來之」，聲借於「來」。 Read: Originally, the shape of a wild duck, it was borrowed to represent the movement from one side to another. From the '自' it moved to a native product of China, it is inferred that the character '來' is used to express the meaning of coming from the outside.	

漢字的藝術：書法

The Art of Chinese Characters: Calligraphy

中國書法是一門古老的書寫藝術，反映了人們在書寫漢字活動中的美學追求。中國書法以漢字為依托，伴隨漢字的演變，在每一個歷史階段都產生了為數眾多的藝術精品。

Chinese calligraphy is an ancient art of writing that reflects people's aesthetic pursuits in the act of writing. Rooted in Chinese characters, Chinese calligraphy has presented numerous artistic masterpieces at every stage of development of Chinese characters.

篆書 Seal Script

結構整齊，字形修長，線條勻稱，運筆圓轉。

It is characterised by the neat and narrow structures of characters, evenly proportioned lines as well as smooth and rounded brushstrokes.

草書 就是草寫的隸書，形成於漢代，為書寫簡便而演變出來，字體結構簡省、筆畫連綿，有草草、今草、狂草之分。

Cursive script is a simplified cursive form of the clerical script, developed during the Han Dynasty for the sake of convenience in writing. Its character structures are simple and its brushstrokes are continuous. There are three forms of cursive script, including clerical cursive, cursive and highly cursive.

行書 介於楷書與草書之間的一種書體，為彌補楷書的書寫速度太慢和草書的難於辨認而產生。楷法多於草法的叫「行楷」，草法多於楷法的叫「行草」。

Running script is a writing style that lies between regular script and cursive script. It was created to address the slow writing speed of regular script and the difficulty in recognising cursive script. Styles that are inclined to regular script are called running-regular script, while those with more cursive elements are called running-cursive script.

漢字的藝術：印章

The Art of Chinese Characters: Seals

印章歷經三千餘年，逐漸發展成為集書法、章法、鑄造、刀法於一體的獨特藝術，早期主要蓋在泥塊上，風乾變硬後便可作加密之用，後來發明了紙張，才蓋於紙上。於方寸之間、紅白之中，印章創造了漢字各種美的結構和形式。

Seals have a history of over 3,000 years and have gradually developed into a unique art form that combines calligraphy, layout design, casting and carving techniques. Initially, seals were used on clay blocks which once dried and hardened could serve as a means of authentication and security. With the invention of paper, seals began to be applied to paper as well. Within the limited space of the seal and the interplay of red and white, seals create a variety of aesthetically pleasing structures and forms of Chinese characters.

漢字裡的古人生活

Ancient Lives Portrayed by Chinese Characters

不少早期的漢字都是以形表意，其結構跟日常事物息息相關。這部分的展覽內容跟東華三院包玉星基金綜合職業復康中心暨宿舍的「易讀製作」工作室合作，透過智障及自閉症譜系人士創作的三個繪本場景，構想古人的生活，並生動地把漢字的演變融入其中。

Many early Chinese characters are pictographic and ideographic in nature whose structures are closely related to everyday objects. This part of the exhibition collaborates with the 'Easy-Read Studio' of TWGHs Chi-Li Pao Foundation Integrated Vocational Rehabilitation Centre cum Hostel. Three pictorial scenes are created by people with intellectual disabilities and autism spectrum disorders to reimagine the lives of ancient people and vividly integrate the evolution of Chinese characters into daily scenarios.
